SUMMARY

Senior Frontend Engineer with **5 years** building React/TypeScript apps at scale. At **Qilin Labs** I lead frontend on a Next.js education platform — I drove the CRA → Next.js migration that lifted Lighthouse from **58 to 92** and cut the bundle from **2.4MB to 720KB**. Author of **@astra-ui-lib/core**, a published React component library with automated CI/CD.

EXPERIENCE

Senior Frontend Engineer

Aug 2024 → Present

Qilin Labs · Remote

- Own frontend architecture, technical direction, and delivery for a Next.js education platform with **20K+ registered users (4K MAU, 1K+ DAU)**.
- Led full migration from CRA to Next.js 14 (SSR/SSG); **Lighthouse jumped from 58 → 92**.
- Cut full page load **~10s → ~3s** and JS bundle **2.4MB → 720KB** (-70%) via route-level code splitting, tree shaking, hover-prefetched navigation, and dependency cleanup.
- Migrated UI system from MUI to shadcn/ui across **30+ components**; unblocked design-token theming and dark mode.
- Established code review standards, sprint cadence, and frontend engineering practices.

Software Engineer · Frontend Lead

Mar 2023 → Sept 2024

Hubspire Corp · Remote

- Refactored a **30k+ LOC** legacy React codebase — dependency cleanup, code splitting, tree shaking, CI optimization — cutting page load times, shrinking JS bundle size, dropping build duration, and accelerating sprint velocity for the team.
- Built React + TypeScript + GraphQL apps with Apollo cache normalization; designed a reusable component system (MUI → shadcn/ui) adopted across 3+ projects.
- Mentored 3 junior engineers toward mid-level — caught architectural issues in code review before merge, pair-programmed on complex tasks, shaped their growth through guided technical feedback.

React Developer

Feb 2022 → Mar 2023

Woxro Technology Solutions · Thrissur, Kerala

- Architected React frontend for banking applications with real-time payment status tracking and Razorpay integration.
- Designed a centralized form-validation and error-handling system used across production applications.
- Shipped production applications across fintech and retail domains.

Web Developer

Jul 2021 → Feb 2022

Limenz Technologies · Calicut, Kerala

- Delivered 10+ production-ready responsive interfaces from Figma/Adobe designs; optimized legacy WordPress sites for mobile and page-load performance.

SELECTED PROJECTS

Astra UI — Published React component library on npm

React 18, TypeScript, Tailwind, Turborepo, Rollup, Changesets · CVA-powered variants, polymorphic components, jest-axe a11y tests, automated semver and npm publish via GitHub Actions.

SketchFlow — Hand-drawn whiteboard & diagramming app

React 19, TypeScript, Rough.js (HTML5 Canvas), Zustand, Vite · 10 drawing tools, undo/redo, PNG/SVG export, dark mode, zoom/pan. Vitest + Cypress.

Pulse Analytics — Multi-domain analytics dashboard

Next.js 16, React 19, TypeScript, Mantine 7, Recharts, Tiptap · 13 domain views and 13 app modules; live theme customizer, fully responsive.

SKILLS

Frontend & UI: React, Next.js, TypeScript, Redux Toolkit, TanStack Query, Zustand, Tailwind CSS, shadcn/ui, MUI, Mantine

Backend & Data: Node.js, Express, PostgreSQL, GraphQL (Apollo)

CMS: WordPress, Drupal

Testing & Tooling: Vitest, Jest, React Testing Library, Cypress, Git, Docker, Vite, Turborepo, Rollup, GitHub Actions, Changesets

AI Tools: Claude Code, Cursor, GitHub Copilot, Vercel AI SDK

Education: B.Tech, Mechanical Engineering · Anna University, Chennai · Jun 2021
