SUMMARY

Senior Frontend Engineer with **5 years** building React/TypeScript products at scale. At **Qilin Labs** I own frontend for a 20K-user education platform and built the multi-tenant **AI voice-agent platform** our clients run telecalling on. Author of **@astra-ui-lib/core**, a published React component library with automated CI/CD.

EXPERIENCE

Senior Frontend Engineer

Aug 2024 → Present

Qilin Labs · Remote

- Own frontend architecture and delivery for a Next.js education platform with **20K+ registered users (4K MAU, 1K+ DAU)**.
- Led the CRA → Next.js 14 (SSR/SSG) migration: **Lighthouse 58 → 92**, page load **~10s → ~3s**, JS bundle **2.4MB → 720KB** (~70%) via code splitting, tree shaking, and hover-prefetched navigation.
- Migrated UI system from MUI to shadcn/ui across **30+ components**; unblocked design-token theming and dark mode.
- Built and own a multi-tenant **AI voice-agent platform** — LiveKit SIP telephony, streaming STT → LLM → TTS, and a Next.js 14 ops console (**31 routes, 107 components**) for call monitoring, agent config, and quality evals.
- Tuned that pipeline to **1.3s p50** round-trip and eliminated audio dropouts (**4.37% → 0%** discarded speech) via VAD/endpointing tuning and regional STT routing (235 → 118ms); **2,585 backend tests**.

Independent Engineer · Contract

2025 → Present

Freelance · Remote

- Running independent engineering engagements alongside my primary role at Qilin Labs.
- Built an AI charm-bracelet configurator for a US jewellery retailer (React 18, TypeScript, Vite, Zustand, TanStack Query, Tailwind), featuring custom drag-to-rotate physics and charm slots. Shipped as a single bundle mounted into a **42,000-line** Shopify OS 2.0 theme.
- Delivered a platform for a commercial real-estate brokerage (Next.js 16 App Router, React 19, Sanity CMS, Mapbox) with map clustering, search, OTP lead capture, and **6** gated calculators across **17 routes** and **41 tests**.
- Modernised Salesforce UI in Apex and Lightning Web Components for a US data-services company (**108 changes** across **16 screens** behind a shared design token), and built a Next.js/Socket.IO intranet for a sports-betting operator.

Software Engineer · Frontend Lead

Mar 2023 → Sep 2024

Hubspire Corp · Remote

- Refactored a **30k+ LOC** legacy React codebase — dependency cleanup, code splitting, tree shaking, CI optimization — cutting page load and build times.
- Built React + TypeScript + GraphQL apps with Apollo cache normalization; designed a reusable component system adopted across **3+ projects**.
- Mentored 3 junior engineers to mid-level through code review, pair programming, and guided technical feedback.

React Developer

Feb 2022 → Mar 2023

Woxro Technology Solutions · Thrissur, Kerala

- Built the React frontend for banking applications with real-time payment status tracking and Razorpay integration; shipped across fintech and retail.
- Designed a centralized form-validation and error-handling system reused across the team's projects.

Web Developer

Jul 2021 → Feb 2022

Limenz Technology Solutions · Calicut, Kerala

- Delivered **10+** responsive interfaces from Figma/Adobe designs; optimized legacy WordPress sites for mobile and page-load performance.

SELECTED PROJECTS

Astra UI  — Published React component library · [npm](#) 

React 18, TypeScript, Tailwind, Turborepo, Rollup, Changesets · CVA-powered variants, polymorphic components, jest-axe a11y tests, automated semver and npm publish via GitHub Actions.

Commercial real-estate platform — client project

Next.js 16 (App Router), React 19, Sanity CMS, Mapbox, TypeScript · **17 routes, 41 tests** · Indexable native listings with map clustering and multi-field search, OTP-verified lead capture, 6 gated deal calculators, and a broker-editable Sanity Studio.

AI charm-bracelet configurator — US jewelry retailer · client project

React 18, TypeScript, Vite, Zustand, TanStack Query, Tailwind · Guided wizard → AI chat → bracelet stage with custom drag-to-rotate physics and drag-to-reorder charm slots; ships as one bundle mounted into a 42k-LOC Shopify OS 2.0 theme.

figma-connect  — Local Figma MCP server with a verification oracle

TypeScript monorepo, Playwright, SQLite/FTS5 · 35 MCP tools for full-fidelity design reads, plus verify_node: pixel-diffs an agent's generated code against the live Figma node in headless Chromium.

[REDLINE](#)  — Android app from a reverse-engineered BLE protocol · [GitHub](#) 

Kotlin, Jetpack Compose, Room · Reverse-engineered my motorcycle's Bluetooth cluster protocol, then built a 14k-LOC app (205 tests) for cluster nav, live telemetry, and ride analytics.

SKILLS

Frontend & UI: React, Next.js, TypeScript, Redux Toolkit, TanStack Query, Zustand, Tailwind CSS, shadcn/ui, MUI, Astro, Mapbox

Mobile & Native: React Native, Expo, Kotlin, Jetpack Compose

Backend, Data & Platforms: Node.js, Python, FastAPI, PostgreSQL, Redis, GraphQL (Apollo), Sanity, WordPress, Drupal, Shopify (Liquid, OS 2.0), Go, Supabase, Prisma, Socket.IO, Salesforce (Apex, LWC)

Testing & Tooling: Vitest, Jest, React Testing Library, Cypress, Git, Docker, Vite, Turborepo, Rollup, GitHub Actions, Changesets, Playwright

AI & Voice: LiveKit (SIP/WebRTC), Deepgram, Silero VAD, Qdrant (RAG), Vercel AI SDK, Claude Code, Cursor, MCP
