SUMMARY

AI engineer with **5 years** of experience across web, mobile, and AI products. At **Qilin Labs**, I built a voice-AI product and worked on school assessment software. I also led a production education platform's migration to Next.js. My client work spans e-commerce, real estate, financial services, and enterprise software.

EXPERIENCE

Senior Frontend Engineer — Aug 2024 → Present

Qilin Labs · Remote

- Built a **voice-AI product** and owned implementation from product requirements through delivery.
- Owned testing and reliability work for conversational features. Project-specific implementation details are kept private.
- Led the CRA → Next.js 14 migration of a **20K-user** education platform: **Lighthouse 58 → 92**, page load **~10s → ~3s**, JS bundle **2.4MB → 720KB**; moved the UI from MUI to shadcn/ui across **30+ components**.

Software Engineer · Frontend Lead — Mar 2023 → Sep 2024

Hubspire Corp · Remote

- Refactored a **30k+ LOC** legacy React codebase: dependency cleanup, code splitting, tree shaking, CI optimization.
- Built React + TypeScript + GraphQL apps with Apollo; designed a component system adopted across **3+ projects**; mentored 3 junior engineers to mid-level.

React Developer — Feb 2022 → Mar 2023

Woxro Technology Solutions · Thrissur, Kerala

- Built React frontends for banking apps with real-time payment tracking and Razorpay, plus a shared form-validation and error-handling system.

Web Developer — Jul 2021 → Feb 2022

Limenzy Technologies · Calicut, Kerala

- Delivered **10+** responsive interfaces from Figma/Adobe designs.

SELECTED PROJECTS

EdTech assessment platform — AI grading · client project

React, React Native (Expo), FastAPI, Supabase, Claude vision · Lead engineer across **three apps** on one backend: a React supervisor app, an Expo app with on-device answer-sheet scanning, and a FastAPI service that OCRs and grades sheets with Claude vision, with teacher review and score override.

AI product configurator — jewelry e-commerce · client project

React, TypeScript, Zustand, TanStack Query · Guided wizard → AI chat → live configuration stage with drag-to-rotate physics; ships as one bundle mounted into a live **Shopify OS 2.0** theme.

figma-connect ↗ — Local Figma MCP server for AI agents

TypeScript, Playwright, SQLite/FTS5 · **35 MCP tools** for design reads, plus verify_node: pixel-diffs an agent's generated code against the live Figma node.

REDLINE ↗ — Android app from a reverse-engineered BLE protocol

Kotlin, Jetpack Compose · Decoded my motorcycle's Bluetooth cluster protocol, then built a **14k-LOC** app (205 tests) for navigation and live telemetry.

SKILLS

AI & Voice: Voice interfaces, conversational AI, speech processing, RAG, vision-based evaluation, MCP
Languages: Python, TypeScript, Go, Rust, Kotlin
Backend & Data: FastAPI, Node.js, PostgreSQL, Redis, Supabase, Prisma, GraphQL (Apollo), Socket.IO, Docker
Frontend & Mobile: React, Next.js, TanStack Query, Zustand, Tailwind CSS, shadcn/ui, React Native, Expo, Jetpack Compose
Testing & Tooling: Vitest, Jest, Playwright, Cypress, GitHub Actions, Turborepo

EDUCATION

B.E. Mechanical Engineering · Dhanalakshmi Srinivasan Engineering College (Anna University) · 2017 → 2021

Also: author of @astra-ui-lib/core, a React component library published on npm.
